

**Water Conservation Standards
For
Matoaka Elementary School**

Original date: September 6, 2006

Revision date: January 29, 2008

This document outlines the measures and standards to be implemented at the site of Matoaka Elementary School in an effort to conserve water and reduce usage. In signing this document, the WJCC Schools agree to honor the following guidelines and measures:

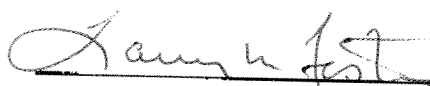

1. WJCC Schools agrees to endorse "Water Smart Landscaping", to include measures to minimize irrigated turf areas and to use drought tolerant plant materials in all landscaping elements.
2. WJCC Schools agrees not to install irrigation systems to support and pre-existing vegetation located on the property. Wherever possible, existing trees and vegetation will be retained.
3. Surface waters will be used for all proposed irrigation. Irrigation from the JCSA water distribution system and the installation of irrigation wells will not be permitted, unless approved by the JCSA General Manager. Where permitted by JCSA, irrigation wells shall only withdraw from the Aquia or the Potomac Aquifers. WJCC Schools agrees to use water-conserving fixtures to promote water conservation. All builder installed appliances should be water efficient models.
4. WJCC Schools agrees to honor and support the efforts of the JCSA and County during periods of water crisis, water restrictions, and drought.
